

# February 2026 Crypto Arbitrage Reports

## Executive Summary

This report summarizes arbitrage trading activity across multiple cryptocurrency exchanges during February 2026. The strategy focuses on capturing short-term price inefficiencies between centralized exchanges by executing simultaneous buy and sell orders. The following metrics reflect aggregated performance derived from recorded trading operations.

| Metric                       | Value         |
|------------------------------|---------------|
| Reporting Period             | February 2026 |
| Total Arbitrage Transactions | 45            |
| Total Volume Traded          | 429.66 units  |
| Average Spread               | 1.15%         |
| Estimated Net Profit         | \$113,929.46  |

## Arbitrage Transaction Log

The table below lists representative arbitrage trades executed across major cryptocurrency exchanges. Each transaction reflects a price differential between two markets where the asset was purchased at a lower price and sold simultaneously at a higher price, capturing the spread.
